

title: Send data to Slack description: Forward messages or alerts via Slack “Incoming-Webhook” integration and Slack output plugin for Logagent, log shipper, filebeat, fluentd or rsyslog alternative with out of the box and extensible log parsing, on-disk buffering, secure transport, bulk indexing to Elasticsearch and Sematext logs management platform

Output Plugin: Slack

Plugin to forward messages via Slack “Incoming-Webhook” integration.

Applications:

- Alert Notifications

Configuration

```
output:
  stdout: yaml
  slack:
    debug: false
    module: slack-webhook
    # Webhook URL
    url: https://hooks.slack.com/services/TOH3BXXXX/B55MHXXXX/dXSsTivciZACphXXXXXXXX
    matchSource: !!js/regexp /.*/
    # filter function to decide for notification via slack
    filter: !!js/function >
      function (context, data, config) {
        if (data.status > 399 && data.error_count > config.minErrors) {
          return true
        } else {
          return false
        }
      }
    # custom property for filter function above
    minErrors: 3
    # yaml, ld-json, json or template
    format: template
    # Text template for slack message
    # all parsed fields can be used
    template: ':st: <@stefan|stefan> {logSource}: {error_count} http errors "{status}"'
    # Payload template (see Slack API)
    payload:
      username: stefan
      channel: '#test'
      icon_emoji: ':smile:'
      attachments:
```

```
- title: Alert  
  color: danger
```

Start Logagent

```
logagent --config myconfig.yml
```
